Roy Cavanaugh, Director
Department of Public Works
51 Depot Street
Suite 203
Watertown Connecticut 06795

Dear Mr. Cavanaugh:

The Conservation Commission/Inland Wetland Agency of the Town of Watertown at a regular meeting held on November 17, 2011 voted to approve application #802 subject to conditions to conduct regulated activities associated with the removal of sediment and maintenance of Turkey Brook near 311 Falls Avenue, Oakville, CT.

Legal Notice of Approval will appear in the Town Times on November 24, 2011. Your permit is enclosed. Please feel free to contact this office if you have any questions concerning this permit.

Sincerely,

Moosa M. Rafee
Wetlands Enforcement Officer

MMR:mr
Conservation Commission/Inland Wetland Agency Permit #802
Located at 311 Falls Avenue, Oakville Connecticut

This approval permit refers to your application to conduct regulated activities in the Town of Watertown.

The Conservation Commission/Inland Wetland Agency of the Town of Watertown has considered application #802 with due regard for the matters listed in Section 10 of the Inland Wetlands and Watercourses Regulations of the Town of Watertown. The Commission has found that the proposed activities as specified and conditioned below conform to the purpose and provision of said section.

The regulated activities consist of the following:

1. Removal of accumulated sediments from the Turkey Brook channel near senior center at 311 Falls Avenue.

The permit is issued subject to the following conditions and/or modifications:

1. The permittee shall notify Wetlands Enforcement Officer, in writing at least three business days prior to the commencement of work onsite and upon its completion.

2. If the approved activities are not initiated on or before November 24, 2016, said activities shall cease and, if not previously revoked or specifically renewed or extended, this permit shall be null and void. Any request to renew or extend the expiration date of a permit should be filed in accordance with Section 11 of the Inland Wetlands and Watercourses Regulations of the Town of Watertown. Expired permits may not be renewed and the wetland agency may require a new application for regulated activities.

3. All work and all regulated activities conducted pursuant to this approval shall be consistent with the terms and conditions of this permit. Any structures, excavation, fill, obstructions, encroachment, or regulated activities not specifically identified and approved herein shall constitute a violation of this permit and may result in its modification, suspension, or revocation.
4. This permit is not transferable without the written consent of the Conservation Commission/Inland Wetland Agency.

5. In evaluating this application, the wetland agency has relied on information provided by the applicant. The Agency has also relied on the State Department of Environmental Protection and Department of Transportation review of the project plans. If such information is subsequently proved to be false, incomplete, or misleading, this permit may be modified, suspended, or revoked and the permittee may be subject to any other remedies or penalties provided by law.

6. No equipment or material including without limitation fill, construction materials, or debris, shall be deposited, placed or stored in any wetland or watercourse and upland review area on or off site unless specifically approved by this permit.

7. This permit is subject to and does not derogate any rights or powers of the Town of Watertown, conveys no property rights or exclusive privileges, and is subject to all public and private rights and to all applicable federal, state and local laws. In conducting and maintaining any activities approved herein, the permittee may not cause pollution, impairment, or destruction of the inland wetlands and watercourses of the Town of Watertown.

8. If the activity approved by the inland wetlands permit also involves activity or a project that requires State DEP, zoning approval, special permit, variance, or special exception, no work pursuant to the wetlands permit may begin until such approval is obtained.

9. The permittee shall install and maintain erosion and sediment control measures at the site in such an operable condition as to prevent the pollution of wetlands and watercourses. Said controls are to be inspected by the permittee for deficiencies at least once per week and immediately after rains. The permittee shall correct any such deficiencies within 24 hours of said deficiency being found.

10. The excavated sediments from Turkey Brook shall be removed from the site and deposited outside of regulated areas.

11. All activities in the watercourse shall be conducted during low flow.

This authorization constitutes the permit required by Section 22a-42 of the Connecticut General Statute, as amended.
