SITE NOTES
1. This plan has been compiled from other maps, records plans, and a limited field survey. It is intended to be used for an engineering design plan. Property lines are approximate and subject to such change as an accurate survey may disclose. (See previous notes)
2. Topography is based on maps by US Army Corps of Engineers from model map at 1:2500 scale. (See previous notes)
3. Underground utility, structure, and facility locations indicated and noted herein have been compiled in part from recent printing supplied by the respective utility companies or government agencies. These locations and facilities are approximate in nature. The designer is advised to perform the necessary site investigations prior to construction. (See previous notes)
NOTE: PROVIDE SEDIMENT CONTROL SACKS AT CATCH BASINS ALONG MAIN STREET AS DIRECTED BY THE ENGINEER.
NOTES:
1) 2" MINIMUM CONCRETE COVER OVER REINFORCEMENT UNLESS OTHERWISE NOTED.
2) DAMP PROOFING TO BE APPLIED ON ALL CONCRETE SURFACES IN CONTACT WITH EARTH.

4) PERMANENT STABILIZATION MEASURES

5) OTHER CONTROL

SOIL EROSION AND SEDIMENT CONTROL PLAN

The Contractor shall purchase and implement temporary erosion control measures specified herein and shown on the plans. The Contractor shall:

- Install, maintain, and monitor the soil erosion and sediment control measures shown on the plans.
- Comply with all permit requirements.
- Provide the Owner, Engineer, and the municipality with 24-hour telephone numbers in the event of an emergency at the site.

PRECONSTRUCTION CONFERENCE

The Contractor shall set a preconstruction conference with the Owner, Engineer, Contractor, and Engineer in a municipal representative to review the proposed soil erosion control measures.

4. DESCRIPTION AND MAINTENANCE OF EROSION CONTROL MEASURES

4.1 TEMPORARY STABILIZATION MEASURES

Implementation of erosion control measures shall be appropriate to the type and size of project and the soil erosion risk level. Erosion control measures shall be implemented to control erosion and sediment from site preparation activities, construction activities, and other activities as may be required by the Engineer or the Owner.

4.2 PREVENTATIVE SOIL EROSION MEASURES

5. OTHER CONTROL

Waste Disposal

Provisions shall be made for the disposal of unuseable construction material and/or tailings generated by construction activities.

Construction Erosion

Provisions shall be made for the control of erosion from construction activities.
