TECHNICAL SPECIFICATIONS

MAINTENANCE AND PROTECTION OF TRAFFIC SPECIFICATIONS

The existing Description is deleted and replaced with the following;

Description:

The item for “Maintenance and Protection of Traffic” shall include all labor, equipment and materials required in accordance with Form 816, except that this item shall also include the cost of signs, barricades, drums, lights, delineators, traffic cones and furnishing and placing of materials such as borrow, gravel, crushed stone, bituminous concrete for patching and pipe. Contractor is solely responsible for work zone safety and shall provide, at a minimum, the work zone signage attached. In general, roadway shall be kept open to at least one-way traffic within the project area at all times, except as noted below, and shall be opened to two way traffic at the completion of the work day. The roadway may be closed and a detour approved for a period not to exceed twenty-one (21) calendar days. Two weeks’ notice is required prior to any road closures or detours. Work zone cone, barricade and signage patterns shall be based on the posted speed limit of 15 miles per hour and the attached plates. Contractor shall provide a detour plan and a road closure schedule for approval by the town. Contractor to install all detour signs prior to detour and cover them until such time as road is closed. Upon completion of closure, all signage shall be promptly removed.
